

Lab 08 - PostgreSQL Integration

Product data stored in PostgreSQL

The screenshot shows the DBeaver 26.1.1 interface. The top toolbar includes options like File, Edit, Navigate, Search, SQL Editor, Database, Window, and Help. The main window displays a SQL script with the query: `select * from medicines_medicine mm`. Below the script, the results of the query are shown in a table format. The table has columns: medicine_id, medicine_name, medicine_description, medicine_stock, medicine_price, medicine_image, medicine_requires_prescription, and medicine_is_active. The results show four rows of data for different medicines.

medicine_id	medicine_name	medicine_description	medicine_stock	medicine_price	medicine_image	medicine_requires_prescription	medicine_is_active
018f333-3333-7000-8000-000000000001	Paracetamol 500mg	Used to reduce fever and relieve mild pain.	120	25,000	medicines/paracetamol.jpg	[]	[x]
018f333-3333-7000-8000-000000000002	Vitamin C 1000mg	Supports immune health and daily vitamin C intake.	80	45,000	medicines/vitamin-c.jpg	[]	[x]
018f333-3333-7000-8000-000000000003	Medical Mask Box	Disposable masks for daily protection.	150	35,000	medicines/mask.jpg	[]	[x]
018f333-3333-7000-8000-000000000004	Tylenol	abc	700	100,000	medicines/tylenol.jpg	[x]	[x]
